

GOOGLE GEMINI | BEGINNER'S GUIDE

A Guide to Gemini GEMS

Build your own custom AI assistants — no coding required

What Are Gemini Gems?

Custom AI Versions

Gems are personalised versions of Gemini AI built to handle specific tasks or areas of expertise.

Instead of typing the same detailed instructions into a general chatbot every time, a Gem remembers its persona, task, and context — so you can jump straight into work.

Think of it like...

A specialist colleague

Always available, never forgets your preferences

A saved playbook

Your rules, tone & context stored in one place

A productivity shortcut

Skip the setup — go straight to results

Why Use Gems?

Three reasons to make Gems a core part of your workflow

Consistency

Always uses your specific brand voice, preferred formatting, and professional tone — no drift between sessions.

Efficiency

Eliminates "context rebuilding." Your repetitive instructions are saved once and applied automatically every time.

Personalization

Feed Gems your own data — past emails, product specs, style guides — so they understand your unique reality.

How to Create Your First Gem

1

Access Gem Manager

Log in to gemini.google.com → click 'Explore Gems' or 'Gem Manager' on the left panel.

2

Start New

Click the '+ New Gem' button to open the creation interface.

3

Define Your Recipe

Set a Name, write Instructions (Persona, Task, Context, Format), and optionally upload up to 10 Knowledge files.

4

Refine & Save

Use the sparkly pencil ✨ icon to let Gemini improve your instructions. Then hit Save.

The Gem 'Recipe' Formula

Use the Persona · Task · Context · Format framework for powerful instructions

P

Persona

"Act as a witty brainstorming partner with expertise in startups."

T

Task

"Generate five creative social media post ideas for a product launch."

C

Context

"The audience is beginner-level marketers unfamiliar with our brand."

F

Format

"Present the output as a markdown table with columns: Idea, Hook, CTA."

Helpful Features for Beginners

Premade Gems

Google provides built-in Gems like Brainstormer, Career Guide, and Writing Editor — use them immediately or copy and modify them to learn how they work.

Gem Generators

Use a dedicated Gem (like 'Edge Gym Generator') to help you write instructions for other Gems — perfect for beginners who aren't sure what to write.

Easy Sharing

Once created, share any Gem with friends or coworkers via a link — just like a Google Doc. Teachers can share directly inside Google Classroom.

Common Use Cases

Education

- Lesson plan generators
- Differentiation designers
- Assignment feedback bots
- Study buddy tutors

Marketing

- Persona-specific content creators
- Campaign performance analysts
- Brand voice checkers
- Social media schedulers

Productivity

- Travel planners
- Recipe & meal experts
- D&D campaign managers
- Personal finance advisors

Education (Students)

- Gems shared by teachers
- Works inside Google Classroom
- Personalised study guides
- Homework explainers

Note for Students

Google for Education Accounts

If you are using a Google for Education account, Gems can be shared with you directly by your teacher — right inside Google Classroom. No setup required on your end!

Look in your Google Classroom for
teacher-shared Gems

Use Gems to get personalised help on
assignments

Feeding Your Gem: Knowledge Files

Upload up to 10 reference files to give your Gem real-world context about your business, brand, or subject area

PDF

DOCX

TXT

CSV

XLSX

PPTX

Brand guidelines

Ensure all output matches your tone, style, and messaging.

Past emails / templates

Let the Gem learn your communication style.

Product specs / FAQs

Give it real facts to reference in responses.

Curriculum materials

For teachers: upload syllabuses and assessment criteria.

Your Quick-Start Checklist

1. Go to gemini.google.com and log in with your Google account

2. Click 'Explore Gems' → explore a Premade Gem to get familiar

3. Click '+ New Gem' and give it a name (e.g. 'Email Drafter')

4. Write instructions using the Persona → Task → Context → Format formula

5. Optionally upload up to 10 knowledge files for extra context

6. Use the ✨ sparkly pencil to refine your instructions, then Save

7. Test your Gem — share it with a colleague or student via link

Ready to Build Your First Gem?

Gems are free to use with any Google account. Start with a Premade Gem, then personalise it — or build your own from scratch in minutes.
